

CAPABILITIES

Seamless Control Panel Support during the COVID-19 Pandemic.

Control panels are vital in protecting your electrical apparatuses and transmission lines from short circuits, overloads, and other faults. Circuit Media understands that during this uncertain time, priority must be placed on sustaining such essential electric services that contribute to our nation's energy security and economic vitality. In support of your mission, Circuit Media ensures affordable, timely, and successful delivery of control panels while complying with all policy and process changes affected by the COVID-19 pandemic. As a federal distributor for US-based Control Panels USA, Circuit Media has extensive experience managing control panel and breaker projects, including the coordination, management, and oversight of material procurement, government furnished equipment customization, transportation, and scheduling resulting in little to no supply chain disruption from the COVID-19 pandemic. With the availability of direct awards to protect our energy infrastructure, now is the time to update your technology.

**HOW WE CAN HELP**

From initial design through production, testing, and delivery, Circuit Media successfully provides the energy sector customized mission-critical products and service. Through detailed project management and accountability, we are able to deliver on our commitments, even during this trying time. Our team offers the following energy-focused products, solutions, and services:

- Project Management
- Quality Control / Quality Assurance
- Provision of:
 - Electrical Engineering
 - Relay Panels/Control and Protection Switchboards
 - Substation Batteries
 - Substation Class Breakers
